PROFESSIONAL SUMMARY

Passionate MERN Stack Developer with a strong focus on frontend development and responsive user interface design. Skilled in building modern web applications using React.js, JavaScript, and Tailwind CSS. Dedicated to creating clean, user-friendly, and efficient digital experiences while continuously learning new technologies and development practices.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, DaisyUI, shadcn/ui

Backend: Node.js, Express.js, MongoDB

Tools & Technologies: Git, GitHub, Firebase, Vercel, Netlify, VS Code

Career objective

Detail-oriented Full-Stack Developer with a strong foundation in building dynamic, responsive web applications using MERN stack technologies. I am eager to leverage my technical skills in problem-solving and modern web architecture to contribute to [Company Name]'s team while continuously growing as a professional in the tech industry.

Projects

1.StudyNook (Online Study Session Management System)

Overview: A full-stack web application designed to facilitate collaborative study sessions, allowing users to browse, create, and manage study materials and sessions efficiently.

Live Link: <https://study-nook-flax.vercel.app/>

GitHub Links: <https://github.com/sazidhossainfahim25/StudyNook>

Key Features:

User Authentication: Integrated secure login and registration using Firebase, supporting social logins (Google) for seamless access.

Dynamic Study Session Management: Allows users to create, view, and update study session details with a user-friendly dashboard interface.

Private/Public Booking System: Enables users to book sessions and manage their study plans effectively with real-time updates.

Role-Based Access Control: Differentiates between regular users and admins/tutors, ensuring secure content management and session oversight.

2.TilesGallery (Digital Asset & Portfolio Showcase)

Overview: A visually-focused web platform designed to display collections of digital assets or design projects in a highly responsive and interactive masonry or grid-based layout.

Live Link: <https://tiles-gallery-beryl.vercel.app/>

GitHub: <https://github.com/sazidhossainfahim25/TilesGallery>

Key Features:

Interactive Image Grid: Implemented a responsive "tiles" layout that provides a seamless viewing experience across mobile, tablet, and desktop devices.

Dynamic Filtering/Categorization: Allows users to quickly filter assets by category or tag for improved discovery.

Detailed View Modals: Features a light-box or modal pop-up effect to display high-resolution images or detailed project information without leaving the gallery.

Optimized Performance: Implemented efficient image loading techniques to ensure fast page load times even with high-quality media content.
